

Cautions and Warnings

for *SL2DC-LRC-AP*

- This product must be installed in accordance with the applicable installation code by a licensed electrician familiar with the construction and operation of the product and hazards involved.
- Power must be OFF when connecting the fixture. "hot plugging" the light engine and driver will damage the LED source.
- The light engine is low voltage and is factory wired to the driver DO NOT CONNECT LIGHT ENGINE TO MAINS AC POWER.
- **4.** LEDs should be protected from dust and debris during during installation and maintenance.
- Polarity is important. Black must be connected to black and red connected to red.

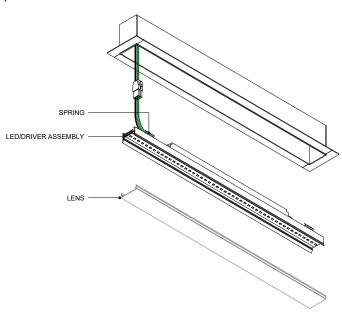

Step A

Refer to cutsheets for ceiling cutout dimensions based upon overall fixture length. Install blocking, tied to framing based upon ceiling cut-out dimensions. Cut rectangular ceiling cut- out and install sheetrock so that ceiling cut-outs and blocking align.

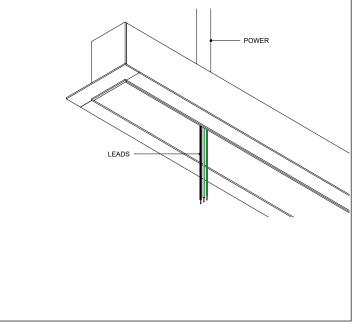

Step B

Remove lens. Remove LED/driver assembly from housing by pulling LED/driver until springs retaining assembly in housing are clear of housing to gain access to inside of housing to access power feed.

Step C

Prior to installing the housing in ceiling. Connect power to housing at feed location on top of housing, leaving 6" leads in place for connections to LED assembly and drivers.

** LED'S SHOULD BE PROTECTED FROM DUST AND DEBRIS DURING INSTALLATION AND MAINTENANCE

Step D

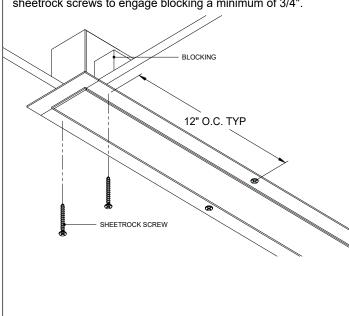

for SL2DC-LRC-AP

Lift housing into cut out until flange is in contact with ceiling and flush all around.

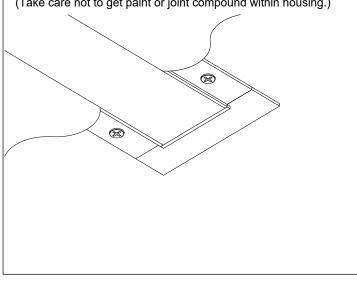

Step E

Secure housing to ceiling/blocking using appropriately sized sheetrock screws to engage blocking a minimum of 3/4".

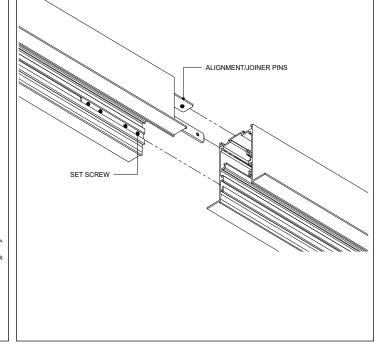

Step F

Finish ceiling, including mudding or plastering mud flange. (Take care not to get paint or joint compound within housing.)

Step G

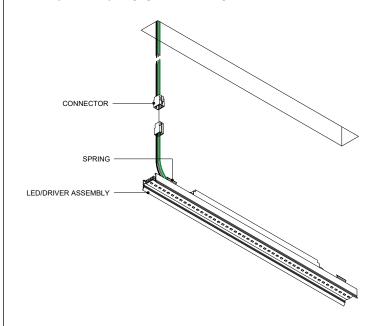

For run lengths that require multiple sections. Pin/joiners may be moved by loosening set screw with 2mm hex wrench and sliding within slot inside of the housing. Lift housing into place until flush and aligned. Guide pin/joiner into corresponding slot. Tighten set screws on pin/joiners to secure housings to one another. Install sheetrock screw through plaster flange into blocking as shown in step E.

Step H

Prior to reinstalling LED/driver assembly into housing, make electrical connection between housing and LED/driver assembly, connect included safety cables then secure assembly to housing by pushing assembly into housing until springs on LED/driver assembly securely engage the housing.

Re-install lens. Turn on power to check electrical connection.
